3. VoIP is Starting in Cambodia

Recently, there two big foreign communication companies have just done contracts with Cambodian companies. One is the Join Venture Agreement between Cambodia Data Communication (Anna Computer Co Ltd. owner) and MediaRing (Singapore). Another is the contract between AZ Communication Company and Chinese Huawei Technologies.

Join Venture Agreement between Cambodia Data Communication and MediaRing is made on 8 September 2005 with the present of H.E Koy Pum, represent of Minister of Post and Communication. This company will provide a new Internet Service Provider in Cambodia.

According to website of People's Daily Online (<http://english.people.com.cn>), Chinese Huawei Technologies, a leading telecom equipment supplier, on Wednesday signed a commercial contract amounting to 30 million US dollars with Cambodia's mobile operator AZ Communication Company Ltd (AZCOM).

Under the contract, Huawei will provide and install on CDMA equipment, transmission and supporting systems for AZCOM CDMA 2000 1X project planned to launch in Cambodia at the end of 2006. The contract will enable AZ Communications to build the first phase of its new CDMA 2000 1X mobile and wireless business in Cambodia

We (EIC) also have been informed that, on 3 August 2005, Cambodia's AZ Communication Company received a license from the Ministry of Posts and Telecommunications to install the CDMA 2000 system, becoming the fifth mobile service provider in the country.

CDMA 2000 1x provides many advantages to users such as:

- Telephone conversation with picture of partner
- Video Conference
- High security that protects users' conversation from voice catching of other equipments
- High speed data processing up to 153 Kbps, which ever had in Cambodia
- Internet, Email, and Multimedia Message with high speed.
